Hot wire cutting tool PFT MINICUT

PFT MINICUT 140 mm in case	Part no. 00 02 06 57
PFT MINICUT 140 mm in cardboard box	Part no. 00 02 02 90
PFT MINICUT 230 mm in case	Part no. 00 23 12 84

The practical hot wire cutting tool is the practical addition to the PFT CUTMASTER with a cutting height up to 1,350 mm and a cutting depth of 310 mm, depending on version.

Delivery contents – PFT MINICUT 140 mm:

Hot wire cutting tool with approx. 3 m power cable, hook, cleaning brush and operating instructions in case

Delivery contents – PFT MINICUT 230 mm:

Hot wire cutting tool with approx. 3 m power cable, hex driver, cleaning brush and operating instructions in case

Spare parts:

Bezel, 140 mm	Part no. 00 02 04 10
Bezel round, 230 mm	Part no. 00 23 80 46
Bezel plane, 230 mm	Part no. 00 28 45 20

Field of application:

The powerful device is just perfect for building trade, industry and design. For boards up to a thickness of 140 mm or 230 mm. The PFT MINICUT 230 mm with electronic power controller for optimal adjustment of cutting temperature.

Advantages at a glance:

- ▶ ready to cut in 10 seconds
- ▶ no dust
- ▶ insulated for your safety
- ▶ no statically charging
- ▶ bezel made of stainless steel can be changed easily

PFT MINICUT 230 mm
with section-adapter

Free selectable forms, e. g. slot
cuttings caused by simple bending
of the cutting strap.

PFT Section-adapter

Part no. 00 28 55 29

Required accessories:

Cutting strap (replacement), 1 m Part no. 00 28 55 27

Functional description:

The new PFT section-adapter for hot wire cutting tool PFT MINICUT 230 mm can be used to cut individual notches out of insulation panels. The width and depth of the notches, for example for empty conduit, can be chosen freely because of the flexible cutting strap. Even very special forms like round arches, cuttings for rafters and much more can be made with the robust cutting strap.

Here: A cutting for rafters ...

... for laying a empty conduit system.
