

Conversion kit for air supported spraying with PFT SAMBA XL

Part no. 00 15 60 87

NEW:

attractive surface structure through jet nebuliser of the pasty knifing fillers.

The PFT SAMBA XL with conversion kit for air supported spraying generated a fine-structured surface.

The jet nebulised , pasty knifing filler can be used as pure white finishing coat or as bases for colour application.

Easy conversion:

Removal of the airless nozzle holder and assembly of the conversion kit.
