# Knauf GIFAfloor support insulation strip

Insulation strips to reduce the impact sound level

## Product description

### Composition

Knauf GIFAfloor support insulation strip is a mixed fibre fleece with adhesive on one side.

### Storage

Store in a cool, dry place and protect from frost and direct sunlight. Shelf life at least 12 months.

### Quality

The product is subject to continuous factory production control.

## Properties and added value

- Adhesive on one side
- Reduction of impact sound level
- Optimised for GIFAfloor floor elements
- Quick and easy installation

## Area of application

Knauf GIFAfloor support insulation strip is used to reduce the impact sound level as a support on linear profiles (steel beams, wooden beams, lightweight steel construction, etc.).

## Implementation

### Substrate and preparation

Line supports must be made level and load-bearing in advance. If, for example, wooden planks are screwed to the side of the existing beams, the flange can be installed on one side ( $\geq 40$  mm) or on both sides ( $\geq 30$  mm).

#### Note

The supporting structure must have the minimum load-bearing capacity corresponding to the use for the load application by the GIFAfloor. Static proof must be provided by the customer.

### Processing

Attach edge insulation strips or sealing tape to the connecting components. Then fix Knauf GIFAfloor support insulation strip to the line supports.

## Technical data

Description	Value	Unit	Standard
Areal weight	350	g / m <sup>2</sup>	DIN EN ISO 29073
Temperature resistance	-5 °C and +80 °C	–	Internal specification
Material composition	50 % PAN + diverse; 50 % PES	–	DIN ISO 2076

## Product range

Description	Height mm	Thickness mm	Length m	Packaging unit	Article number	EAN
GIFAfloor insulation strips	60	3	20	100 m / box (= 5 rolls)	91287	4003982197139
