

# Aquapanel Exterior

## Knauf Aquapanel Exterior Joint Filler – Grey

### Knauf Aquapanel Exterior Boards and Accessories

Aquapanel Exterior cement board technology sets new standards for the design and construction of buildings across Europe. Aquapanel Exterior offers a high quality and economical alternative to traditional methods of construction, such as brick and block. It provides a solid, dry base that can withstand the extreme weathering effects of wind, rain and snow. It is an ideal substrate for Aquapanel Plaster and other render finishes (subject to approval). It can be used for exterior walls in ventilated systems, water managed (directly applied) systems, exterior ceilings and soffits.

Aquapanel Exterior Joint Filler – Grey is a cement-based material for filling joints and embedding Aquapanel Exterior Joint Tapes and Aquapanel Exterior Reinforcing Mesh as part of the Aquapanel Exterior system.

Compliance: EN 998.

Bag Size	Material No.	Pallet Details	
Kg		Bags	Tonnes (Approx.)
20	131094	48	1.0

Estimating Guide: One bag will cover approximately 28m<sup>2</sup>.
